TITLE: **Receiving apparatus and data rewriting**
method

---------- KWIC ---------

Detailed Description Text - DETX (22):
  Also, the CPU 41 judges that the download data D10 is
correct data when the
standard Hash value is coincident with the Hash value
for comparison. The
download data D10 stored in the <u>RAM</u> 43 is supplied from
the <u>RAM</u> to the flash
<u>ROM</u> 44 through the CPU bus 42 to <u>overwrite</u> the
program data recorded in the
flash <u>ROM</u> with the download data D10.
